ABOUT ME

Information Systems undergraduate at Universitas Teknologi Digital Indonesia and Full-Stack Developer Intern, building web-based applications across frontend, backend, REST APIs, and relational databases. Currently developing an MRP support system at CV Karya Wahana Sentosa. Projects include a decision support system using Hybrid Entropy-TOPSIS, with interests in application security and data analysis.

EXPERIENCE

August 2026 – Present
CV Karya Wahana Sentosa (KWaS)
kwas.co.id

Full-Stack Developer Intern

- Develop an MRP support system to assist material requirements planning workflows.
- Contribute to frontend development, backend functionality, and system integration.
- Provide educational guidance on MRP concepts and explain system functionality to support knowledge transfer.
